

*Proyectos Industriales y Representaciones de
Coahuila S.A de C.V*

About Us

We are a company located in the central region of the state of Coahuila, oriented to the metal-mechanical business, we design and build turnkey projects. We have manufacturing facilities and equipment to provide services and products that meet the requirements of our customers.

Our Products

PIRCO has an area of 40,000 m² for structural manufacturing. We have the processes of machining, welding, sand blasting, painting, in addition to a storage area and 8,500 m² of industrial warehouses, equipped with the highest quality machinery and traveling cranes for material handling.

Manufacture of equipment for the electrical energy industry, such as the manufacture of pole welding machines up to 2 meters in diameter, components for wind towers and electrical transmission poles. Manufacture of devices for the automotive industry. Cranes with a capacity of up to 230 tons for maneuvering and lifting for the steel industry. Railway tank manufacturing equipment.

Work Equipment

Laser CNC DURMA HD-F 6025 de 8 KW

Plasma CNC ESAB Avenger X P2 4000

Plasma CNC ESAB Avenger 6500

Plasma CNC HYPER THERM Pro-Arc

Gantry Machining center CNC HARTFORD PRO-3210SG

Vertical machining center CNC TOYODA WELLE AA1165G

Work Equipment

Vertical machining center CNC DOOSAN DNM
5700

Centro de torneado vertical CNC DOOSAN
PUMA GT3100L

Vertical turning center CNC TAKISAWA LA-300-2

Vertical turning center CNC VIPER VT-28BL

Press brake CNC DURMA AD-S60600

In addition, at PIRCO we have:

- Profile and plate rolling machine.
- Band saws with degree and vertical counter.
- CNC drills.
- Different curtain presses with lowering and CNC stops.

Wind Industry

We are a manufacturer of production systems and logistics components for the wind industry, and many other steel products, providing a complete solution to the needs of each of our clients.

More than 10 years of experience just in the wind energy sector supports us, always with the best quality, delivering the best manufacturing of turnkey products.

We are committed to providing quality assurance in steelmaking for wind turbine original equipment manufacturers around the world.

We specialize in developing equipment that solves the specific challenges our customers face in wind towers transportation.

We always work under continuous improvement, because we know that the market needs to adapt with better and more efficient solutions.

Our quality and operational excellence speaks for itself.
